Ch 1 Program 1: DisplayStudentInfo.java

Please adhere to the *Standards for Programming Assignments* and *Java Coding Guidelines.*

Answer the following question in a Java program that uses *System.out.print* or *System.out.println* to display the following information about you as output.

1. Your first and last name

2. Do you have any prior computer science courses and other related coursework?

3. Will you be working on assignments at your home? If yes, then which computer would you use for this course, Mac or a Windows?

4. Do you know any other programming languages? If yes then which ones?

5. Write a brief description of a program that you wrote in the past and liked the best if there is any?

6. Do you have any concerns about this course?

Use at least six or more *System.out.println* statement to answer these questions. If a line is more than 80 characters, then break it up into multiple lines or use multiple *System.out.println* statements.
Output must be listed as comments under the standard comment header.

Submit the following on canvas:

*   Submit DisplayStudentInfo.java

```
//Sample Output
/*
My name is Robert, you can call be Bob.
I have taken CSC100AA "Introduction to Computer Programming" last
semester.
Yes, I will be working at home on a Windows computer.
Yes, I know C++ programming language.
In C++ I wrote a program that generates random number. It was really
cool!
